**HEADWATERS**  
AT THE COMAL

## **THE HEADWATERS AT THE COMAL, A CONSERVATION LEGACY TO:**

### **EDUCATE & DEMONSTRATE**

Inspire lifelong practice of enjoying, protecting, and stewarding cultural and ecological resource in those that live in, visit, and make decisions about Hill Country natural resources.

### **PROTECT & CONSERVE**

Ensure protection and conservation of the Comal Springs/Comal River system, including the headwaters, and the endangered species it supports, in perpetuity.

### **RESEARCH**

Partner in research opportunities that allow for exploration and discovery of this site and connect New Braunfels with regional science and identify and demonstrate solutions to real world problems.

### **COMMUNITY ENGAGEMENT**

Provide an innovative, nature-oriented gathering and meeting space that builds a regional ethic of valuing cultural and ecological resources.

The Headwaters mission is to strengthen the relationship between the community and nature by showcasing the significance of the Comal Springs, the heart and soul of New Braunfels. We also intend to create a premier education center that will inspire hearts and minds about the importance of conservation.

Once completed, the Headwaters at the Comal will allow us to reach people of all ages. The project will demonstrate innovative new techniques in water and energy conservation and foster awareness about this unique riparian area through a variety of educational programs, arts, and culture in a beautifully restored environment filled with the shade of native trees, and surrounded by native plants and grasses.
